Re: East Texas Irradiator Downtime - **Update**

Update: The East Texas Irradiator has been repaired and is back in service.

Background

Regrettably, the East Texas facility irradiator is currently out of service. We are working with the vendor to perform repairs. Service is currently scheduled, however, a definitive timeline for repair is unavailable.

During the equipment downtime, a supply of irradiated components will be available at our East Texas facility from our North Texas Facility in Bedford Texas. In the event that the irradiated stock is depleted, orders will be dispatched directly from our North Texas facility.

Impact to Clients:

- Please alert your staff of the equipment downtime and potential delay in irradiated products.
