Enrichment Lab
2026

Blood Bank

Refresher Course Level II

Program Description and Course Agenda:

This comprehensive program will explore the full spectrum of blood collection and transfusion services, from donor recruitment and blood product collection to advanced product manufacturing and prehospital transfusion practices. Participants will gain insight into blood drive operations, automated blood product production methods, and the growing role of prehospital transfusion in emergency medical services (EMS). The program will also highlight successful EMS and hospital partnerships, including strategies for implementing and utilizing Low-Titer O Whole Blood (LTOWB) in massive transfusion protocols.

Additional topics include innovative approaches to recruiting and retaining rare blood donors, coordinating special donor collections, and supporting patients with complex transfusion needs. Through real-world case studies, attendees will examine challenges and best practices related to rare blood procurement, special collections, and transfusion support for patients requiring uncommon blood products.

This multidisciplinary program offers practical knowledge and collaborative perspectives from blood centers, EMS providers, and hospital transfusion services. Appropriate for medical and laboratory professionals with an intermediary understanding of blood bank concepts and knowledge.

Date: Wednesday, September 30, 2026

Time: 7:00 a.m. – 3:00 p.m.

Location: Texas Star Golf Course and Conference Center
1400 Texas Star Parkway, Euless, TX 76040

RSVP: hospitalrelations@carterbloodcare.org
