**Date:** October 2, 2017  
**Re:** Flow Laboratory Relocation  
Tuesday, October 17 - Wednesday, October 18, 2017

The Flow laboratory at Carter BloodCare Bedford will be moving on October 17-18, 2017, to a new area in the building. Validation of the equipment must be completed prior to resuming patient testing. While we anticipate minimal problems with the move, please be aware that the turn-around-time for completion of testing may be increased for fetal hemoglobin and CD34 results during this time frame.
