Re: COVID-19 Convalescent Plasma Product Code

Background

In an effort to meet the daily convalescent plasma demands, Carter BloodCare is importing this product from other blood centers to supplement our inventory. We anticipate that some of the imported products may be derived from whole blood collections. These units will have a different product code than what has previously been distributed.

Impact to Client

Please add product code E9735 to your blood bank information system in preparation for receipt of possible imported convalescent plasma products. The associated thawed product code is E9780.

 W0352 20 601460 S T	 9500
Carter BloodCare Bedford TX 76021 FDA Registration Number 1650777 US License Number 1274
