Re: UPDATE – Cold Stored Platelets

Carter BloodCare continues to prepare submission for an FDA variance to implement the use of cold stored platelets. The previous target FDA submission period was Q2 of 2020. The new target FDA submission period is August 2020. Once the variance has been received by the FDA, the FDA has twelve months to review and approve. We will continue to keep you apprised of the timeline as we receive updates.

In the meantime, please take the following actions:

- Update laboratory and/or blood bank information systems to accept the ISBT product codes associated with cold-stored apheresis platelets. Example labels are contained for your reference including irradiated product codes.
- Review and update policies associated with platelet storage and indications for use.
- Inform laboratory medical directors and clinicians of the anticipated new component and its indications for use.
