Re: Irradiator – East Texas

On Friday, July 9, 2021 at 1500, through Saturday, July 10, 2021 at 0700, the irradiator at the East Texas location will be unavailable. The irradiator will be available after this time, but expect some slight delays in ordering products needing irradiation through Monday, July 12, 2021.

In preparation, a supply of irradiated components will be available on hand. Additional requests for irradiated products will be dispatched from the Bedford location.
