

Carter BloodCare

To: Transfusion Services Managers
From: Hospital Relations Department
Date: December 20, 2016
Re: Liquid Plasma Update

Carter BloodCare will be ready to produce and distribute liquid plasma after December 20, 2016. As a reminder, this product will primarily be available in Group A. Group AB orders must be pre-approved. Additionally, the product is non-returnable due to the extended shelf life. Please allow 48 hours to fill the order once requested as the liquid plasma will be produced from freshly collected whole blood units which cannot be released until viral testing is completed.

Initial orders will be handled as special orders and require a set delivery cycle. Please contact Veronica Moore at vmoores@carterbloodcare.org for initial order set-up. Future orders will be handled directly through Distribution as standing orders.
