Re: Fax Order Form & HbS Testing

DPF200.20A; Fax Order Form

An updated version of the Fax Order Form (attached for immediate use) is effective today, August 3, 2022. Changes include the addition of low titer O whole blood and the removal of convalescent plasma.

As a reminder, the Service Manual is accessible to you and your staff through the Specialty Services website. To access the Service Manual, please navigate to www.cbcspecialtyservices.org and click on the “Service Manuals and Forms” icon at the top right corner. Under “Service Manuals” click on “Carter BloodCare Service Manual.” Section 11.0 Hospital Services Forms has been updated to include the current version of the Fax Order Form.

Historical donor HbS results on iWeBB

Historical donor HbS status via iWeBB® is now available. We encourage you to use this resource when screening units for select antigens and HbS status. If you are unfamiliar with this tool, please contact hospital relations for a demonstration.

The screenshot shows the 'Historical Antigen Test Results' interface. At the top right is a 'Back To Home' button. Below the title, there is a 'Reports For:' field with a redacted name and '01'. Search options include 'Search By Date' (selected), 'Expiration Date', 'Search By Unit ID', and 'Shipped Date'. A 'Quick Date Selection' dropdown is set to 'From Date: 07/27/2022' and 'To Date: 08/03/2022'. A 'Search' button is present. Below this, the 'Start Date' is 7/27/2022, 'End Date' is 8/3/2022, and 'Search Results Count' is 143. The 'Antigen Types' section has checkboxes for Jsa, V, S, s, HbS (checked), C, c, E, e, K, Jka, Jkb, Fya, Fyb, and M. The 'Antigen Result' dropdown is set to 'N' and 'Blood Type' is empty. A 'Filter' button is next to it. Below the filters, 'Filter Results Count: 24' is shown. A table lists the results:
